

# MVP<sup>2</sup>

## National Pollution Prevention Roundtable

### 2008 MVP2 Award Recipients

#### Volunteer of the Year

Sara Johnson, New Hampshire Department of Environmental Services

Sara has been a dedicated member of the NPPR Board for two years and has been the chair of the Membership committee, an MVP2 awards judge, as well as a participant in the planning and a presenter at the National Environmental Partnership Summit.

#### P2 Champions

Don Huisingh, University of Tennessee

Don's work has focused on Pollution Prevention/Waste Reduction approaches to managing toxic substances and hazardous wastes. He is active in many national and international organizations including, UNEP, UNIDO, WHO, and the World Bank. He is the editor-in-chief of the *Journal of Cleaner Production*.

Joel Tickner, University of Massachusetts-Lowell

Joel has also been instrumental in getting the NPPR and the Green Chemistry and Commerce Council (GC3) to work collaboratively on a joint project on business incentives to advance green chemistry innovation.

#### Projects/Programs

Harris Corporation - Broadcast Communications Division

Harris Corporation and its employees are dedicated to conducting business as a responsible corporate citizen in protecting people, property, and the environment at all company operations.

Illinois Sustainable Technology Center - The Cutting Edge Partnership

The Cutting Edge Partnership<sup>s</sup> focuses on bringing together a variety of expertise in machining, formulations, recycling, product management, environmental health, and safety to help companies address the uncertainties in adopting new technologies.

Kentucky Pollution Prevention Center - Prevention and Energy Efficiency Technical Assistance Program

The project focuses on implementing Process Water Management (PWM) that are designed to reduce water usage and simultaneously identify potential chemical reductions and energy efficiency opportunities.

Massachusetts Toxics Use Reduction Act Program

Tura's goal is safer and cleaner production and services that enhance the economic viability of Massachusetts firms and advance healthier communities and workplaces.

New England Mercury Task Force

The Northeast states, through their state mercury reduction programs, are achieving significant and rapid reductions in mercury releases from in-region pollution sources, and are beginning to see indications that these reductions are resulting in lower accumulated mercury levels in the environment.
